

# *Flatdeck Trailers*

**NORBERT'S**  
*Trailers*

Norbert's own adjustable self-guiding coupler allows for effortless hook up.

With ramps flipped and center section on greasable hinges dropped, objects can be loaded with ease.

Checker plate on beavertails with center section flipped up allows for an additional 4 1/2' of deck space.

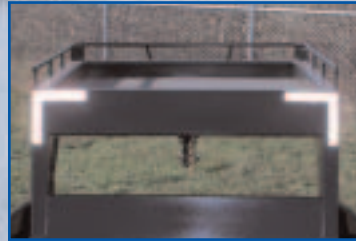

Beavertail ramps are lifted easily with spring assist and are adjustable for loading narrower objects.

### Standard Features

- Adjustable easy guide coupler or king pin.
- Square, sheeted in neck.
- Torsion axles with 10 ply tires and heavy-duty wheels.
- Single 12,000 lb. jack on light duty trailers and tandem jacks on heavy-duty models.
- Tubing beam frame on light duty trailers and wide flange I beam on heavy duty models.
- Mud flaps
- Complete sealed wiring, conspicuity tape and breakaway kit.
- Fir decking

Square gooseneck with sheeted in steel floor and tie rail, allows for storage over hitch area.

Tubular side rub rails are stronger and cleaner looking than traditional flat iron rails while also protecting light wiring.

### Available Options

Norbert's realizes the needs of each customer are different so the majority of trailers sold are custom tailored for each customer. The following is a small list of available options:
